

Hilal Ahmad Najar

Programmer Analyst, Bitwise Solutions, Pune

Phone: 7780921703 | Email: hilalahmad456@gmail.com | LinkedIn: linkedin.com/in/hilal-ahmad-32a39211b

Professional Summary

Results-driven Data Engineer with 5 years of experience building scalable ELT/ETL pipelines across GCP and Snowflake. Proficient in leveraging modern data stack technologies including dbt, Kubernetes, BigQuery, Composer (Airflow), Cloud SQL, and Pub/Sub. Proven track record of architecting robust data models (including Iceberg and CDC tracking), automating multi-environment schemas, and delivering high-impact solutions through effective cross-functional collaboration.

Skills & Abilities

- **GCP & Cloud:** Kubernetes, Docker, BigQuery, Composer, Pub/Sub, Cloud SQL, Snowflake, dbt, Redis
- **Languages:** Python, Java, SQL
- **Tools & Frameworks:** Apache Airflow, GitHub, VSTS, Jenkins, Eclipse, VS Code

Experience

Data Engineer Level 2 | Bitwise Solutions, Pune

Apr 2025 – Present

- Built production dbt + Snowflake (Iceberg) ELT pipeline for merchant underwriting data, implementing 100+ incremental models with CDC-based history tracking, enforced data contracts, and multi-environment schema automation across dev/QA/cert/prod.
- Migrated production applications from Google App Engine to Kubernetes clusters, improving scalability, deployment flexibility, and infrastructure maintainability.
- Maintained 99.9% uptime and ensured seamless data delivery through reliable pipeline integrations.

Data Engineer Level 1 | Bitwise Solutions, Pune

Apr 2022 – Mar 2025

- Designed and implemented a robust data quality and auditing framework to monitor Cloud Composer, Dataflow, and BigQuery jobs, enabling proactive detection of anomalies and improving overall pipeline reliability.
- Automated DAG dependency management in Composer—achieved a 95% on-time job completion rate.
- Mentored junior developers on GCP best practices and ETL design patterns.

Trainee Programmer | Bitwise Solutions, Pune

Sep 2021 – Mar 2022

- Developed batch ETL processes in GCP using Python and Unix shell—handled nightly loads of 500M+ records.
- Scheduled and monitored Dataflow jobs through Composer—ensured round-the-clock pipeline reliability.
- Implemented BigQuery transformations with schema evolution and consistency checks.

Education

Masters in Computer Applications (MCA) — Jammu University

Aug 2017 – Oct 2020 | CGPA: 8.2

Bachelor in Computer Applications (BCA) — Kashmir University

Mar 2014 – Mar 2017 | Percentage: 71.2%

Awards & Recognition

- Excellence Award, Bitwise Solutions (December 2022) – For consistent demonstration of technical and collaborative excellence.
- Shout Out, Bitwise Solutions (Feb 2025) – Recognized for building the Automated Data Quality Validation Utility.
